Undergraduate Research Assistant Position

Yale undergraduates interested in working as research assistance are welcome to apply directly following the directions on this form. Undergraduate researchers provide research assistance across a number of my projects which you can read about in more detail at www.johnerichumphries.com/research.

Qualifications:

Candidates should have quantitative and coding skills, especially experience in general purpose languages like Python and statistical languages like Matlab, R, or Stata. Candidates experienced working with R, stata, and Latex are preferred. Candidates need not be economics majors, though they should have experience with economics. We welcome applicants from other fields such as, but not limited to, computer science, engineering,mathematics, physics, political science, psychology, and statistics.

How to Apply:

Applications should email a **single pdf document** to johneric.humphries@yale.edu with subject line "Yale Undergraduate RA Application":

- Short cover letter highlighting qualifications for the position, your education level or year in the college, and any other relevant information.

- Resume or CV with the following information:

  - Your familiarity with R, stata, and other programming languages

  - Your experience as a research assistant and with any independent researcher

- Transcripts

- Writing sample (e.g. term paper)

- Coding sample (e.g. R, stata, or python code used in an empirical project or written for class, not required)

- Any other relevant information.
